Powered by:

Strive build world-class go-to-market teams for some of the most disruptive, Venture Capital Backed tech companies, all over the world.

Our team has successfully hired for some of the hottest vendors across the US and EMEA, backed by the likes of Sequoia, Insight Partners, A16Z, Accel, Index, Intel, SFV, GV, Craft, Boldstart, NEA, CRV... the list goes on.

Strive don’t just place people, they build entire teams.

Dashboard Functionality

Exploring key features of the live dashboard

The dashboard integrates vital data from Greenhouse and Workday, providing a comprehensive view of recruitment processes, enhancing decision-making through visual representation and real-time updates.

How to Start

API Key

Retrieve your ATS key from Greenhouse.

Start Small

Focus on a few roles to begin building.

Build Up

Expand dashboard functions as you gain comfort.

2 weeks

It takes approximately two weeks of focused work to build the initial version of the dashboard, making it a manageable commitment for teams aiming to enhance recruitment efficiency.

Enhancements Over Time

Slack Integration
Automatic updates for recruiters on assignments

Automated Emails
Triggered notifications for new hires sent out

Issue Reporting
Quick way to flag dashboard problems easily

Edit Log
Track changes and restore previous versions

Sharing the Dashboard

Collaborative tools for maintaining recruiting efforts efficiently

Effective sharing and maintenance of the dashboard is essential for collaboration.
